RADIATION ONCOLOGY SAFETY COURSE

A four-day theoretical and practical course facilitating participants to identify factors contributing to near incidents and incidents, the reporting, analysis and management of incidents and reducing incident occurrence

Participants: Health Professionals with an interest or involvement in risk management in oncology

Course Dates: 2nd – 5th September, 2019

Course Venue: Discipline of Radiation Therapy, School of Medicine, Trinity Centre for Health Sciences, St. James' Hospital, Dublin 8, Ireland

Aims of the Course:

To explore the occurrence of incidents and near incidents in radiation oncology, methods of reporting, analysis and management and how incidents can be reduced in the future.

- To heighten awareness of the occurrence of incidents and near incidents in radiotherapy
- To achieve greater accuracy in radiotherapy through incident prevention
- To encourage a culture of openness in relation to incidents

LEARNING OUTCOMES:

- To give participants the tools and understanding of how to minimise the risk of incidents occurring
- To ensure best practices in risk management aiming to enhance safety in radiotherapy
- To enable international collaboration in incident reporting and encourage a culture of reporting incidents

Course Fees: Includes course notes, lunches, tea and coffee and course dinner:

Early registration (before 15 th June 2019)	€ 600
Late registration	€ 700
Two or more participants from the same centre discount €50 for second or subsequent participants
